Ukrainian citizen with temporary collective protection in Norway (full right to work) · Open to remote

SUMMARY

Python developer with hands-on experience in data engineering, data analysis, and full-stack development — work where data accuracy and reliability mattered. A proactive, self-directed learner who takes ownership: recently returned to hands-on development and am now moving into test automation, CI/CD, and quality engineering. Comfortable with Python and Git across Windows and Linux, with a genuine interest in virtualization, containers, and cloud.

SKILLS

Languages: Python, SQL, JavaScript / TypeScript

Development & Tools: Flask, REST APIs, SQLAlchemy, Git / GitHub, HTML/CSS

Data & Quality: PostgreSQL, MySQL, data validation & analysis, ETL, Power BI

Platforms: Windows, Linux

Currently building with: FastAPI, React, TypeScript, AI-assisted development (Claude Code)

Learning for this role: test automation (Playwright, pytest), CI/CD, Docker & Kubernetes

EXPERIENCE

Returning to Software Development (self-directed) — Current Focus

Remote · 2024 – Present

- Rebuilding hands-on engineering skills with a focus on modern, AI-assisted development.
- Following AI coding tools (Claude Code and peers) and modern agentic development workflows.
- Building a full-stack web app (“life OS”) with FastAPI, React, and TypeScript. [In progress]

Career Break — Relocation from Ukraine — —

2022 – 2024

- Relocated to Norway following the outbreak of war; break from professional work.

Data Analyst / Python Full-Stack Developer — agenta.design

Remote (Kyiv, Ukraine) · Jul 2020 – Feb 2022

- Built and maintained Python full-stack features (Flask, JavaScript/jQuery, Bootstrap) on a PostgreSQL backend.
- Developed data-analysis workflows to support product and business decision-making.
- Collaborated within a distributed team using Git and GitHub.

Python / Machine Learning Developer (Freelance) — Upwork

Remote · 2019

- Delivered freelance Python and machine-learning project work for clients.

Data Engineer — Huawei Technologies

Kyiv, Ukraine · May 2018 – Oct 2018

- Prepared and validated company data for monthly reporting using Power BI, ensuring accuracy and consistency.
- Wrote Python scripts to automate and improve recurring data-preparation tasks.

Data Science Intern — DataRoot Labs

Kyiv, Ukraine · Oct 2017 – Feb 2018

- Completed an intensive applied data science and machine-learning program, building core DS/ML foundations.

Junior Java / SQL Developer — National Technical University of Ukraine 'KPI'

Kyiv, Ukraine · Mar 2016 – May 2016

- Wrote scripts for MS SQL databases and assisted with basic database administration.

EDUCATION

B.Sc. in Computer Engineering — National Technical University of Ukraine 'Kyiv Polytechnic Institute' (KPI)

Kyiv, Ukraine · 2012 – 2017

DataRoot University — “Practical Way to Learn Data Science & AI” (applied Data Science / ML program)

2017 – 2018
